Famjet Sideron

**Industrial inkjet printer
with integrated printhead moving mechanism.
Ideal for printing perpendicular messages
on stationary objects in intermitting conveyor lines.**

On the basis of our experiences in the production of Thermal inkjet printers, we are glad to announce the introduction of the new Famjet Sideron, an innovative and compact printing device in which the printhead moves automatically to print on a non-moving object.

The Sideron enables to print on a large range of porous and non porous surfaces, multiline messages in a printing area of 100mm (width) x 25mm (height).

The powerful software enables to edit and print messages containing text, date, time, 1-D and 2-D barcodes, numbers and logos. The new Famjet Sideron is a printer based on thermal inkjet technology and equipped with disposable cartridges containing water or solvent base inks in a large range of colors (Including white and yellow).

The only printer capable to print messages 100 mm wide on stationary objects in intermitting conveyor lines.

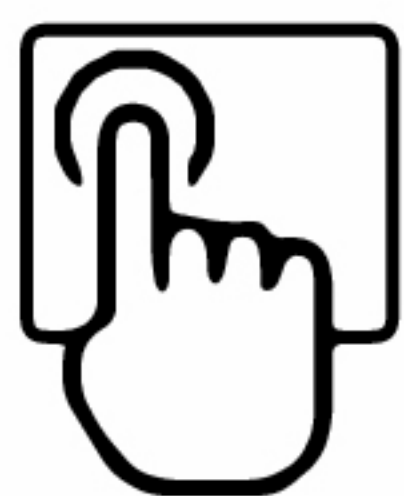

Technical Specifications

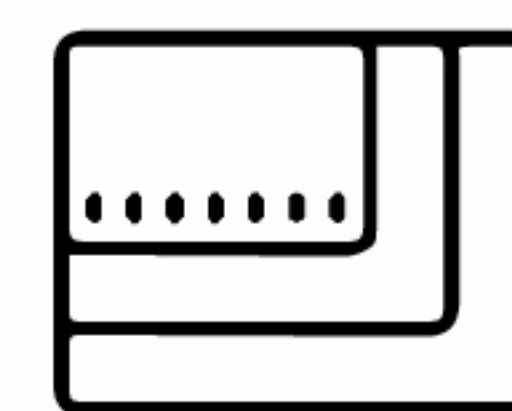

FamJet Sideron

Printing height:
up to 25,4 mm

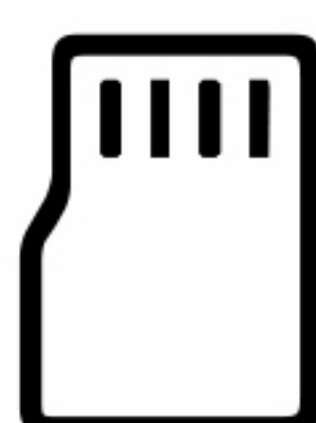

Display:
Touch Screen
3,5"

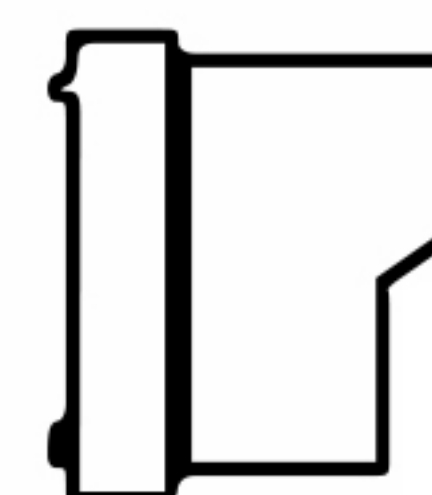

Resolution:
Up to 750 dpi

Printing capabilities:
Alphanumeric characters,
Autodate, logos, QR Code,
Barcodes and Datamatrix

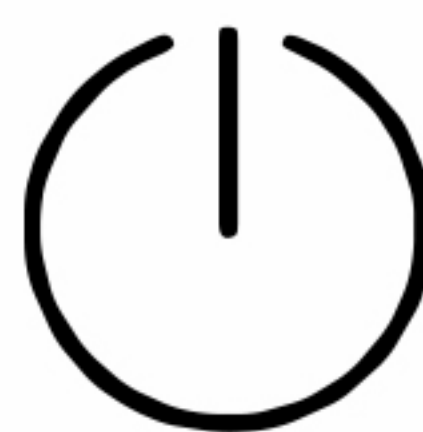

Memory:
8 GB,
16/32 optional

Consumables:
Disposable 42ml
cartridges
12,7 mm HP® or
25,4 mm KaoCollins®

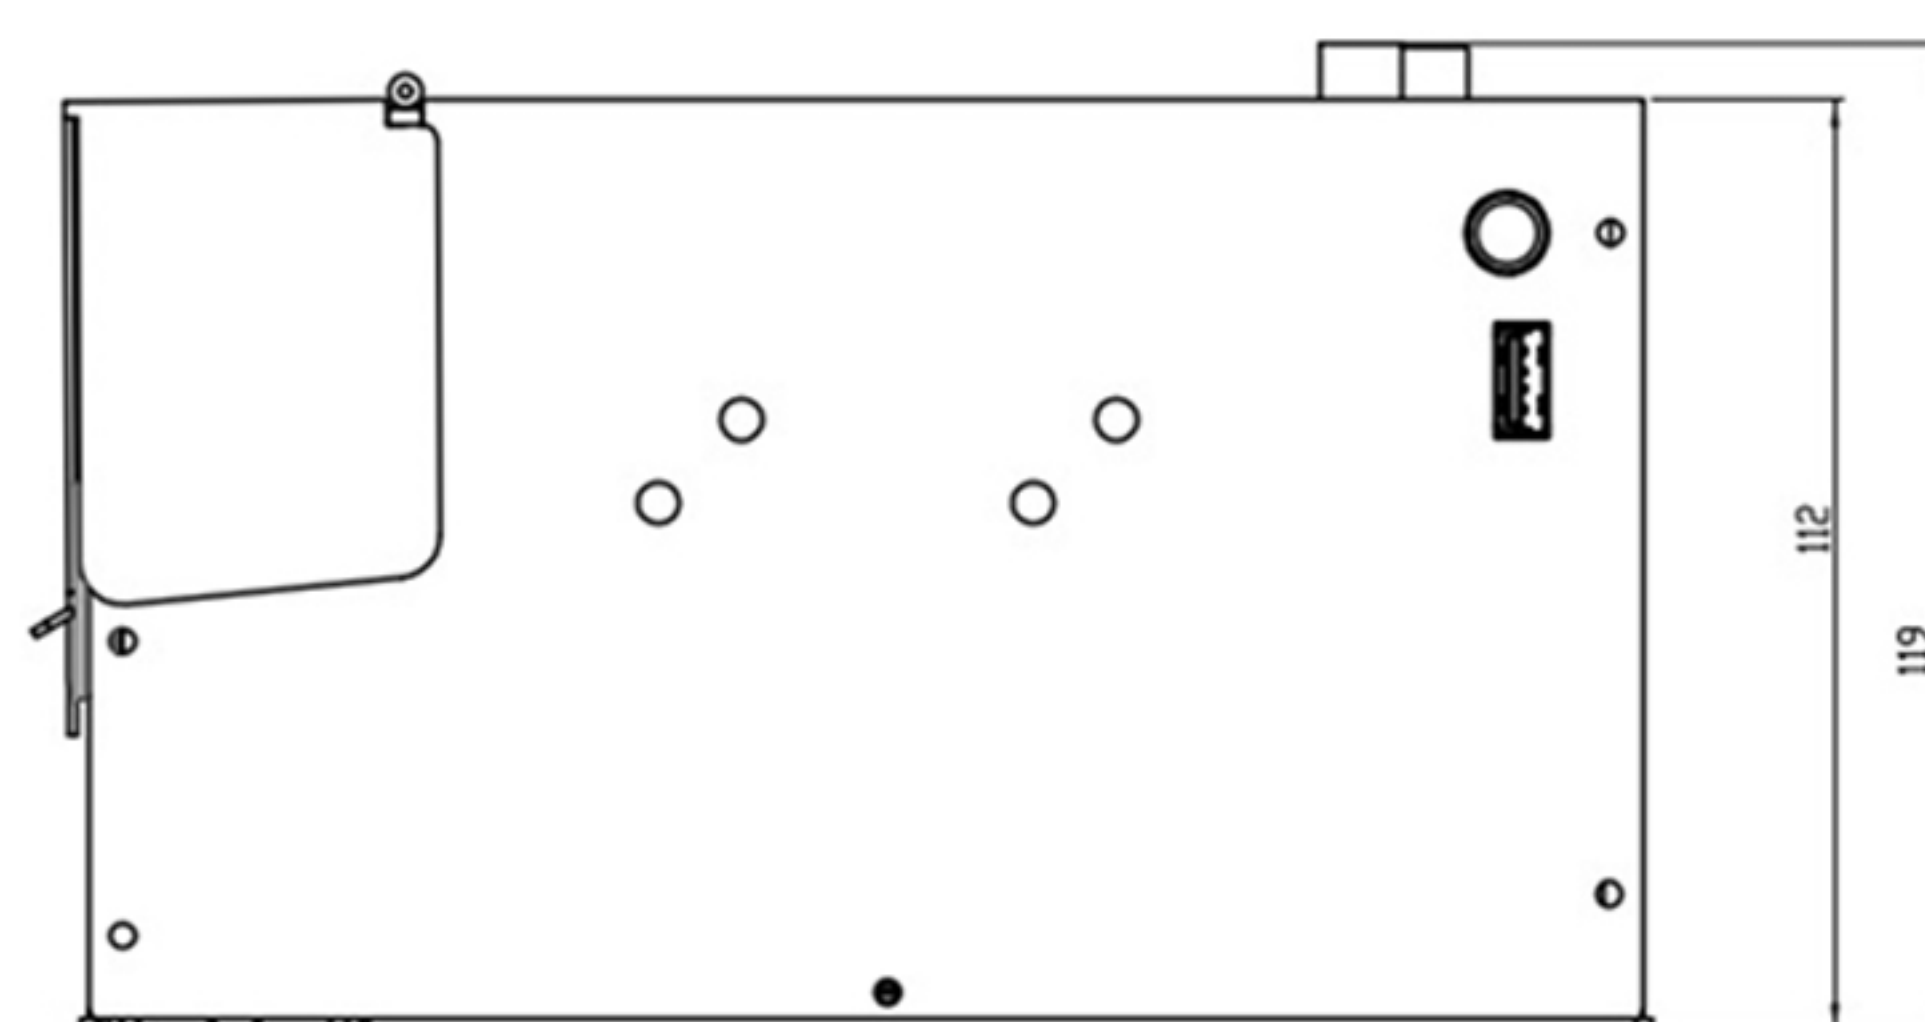

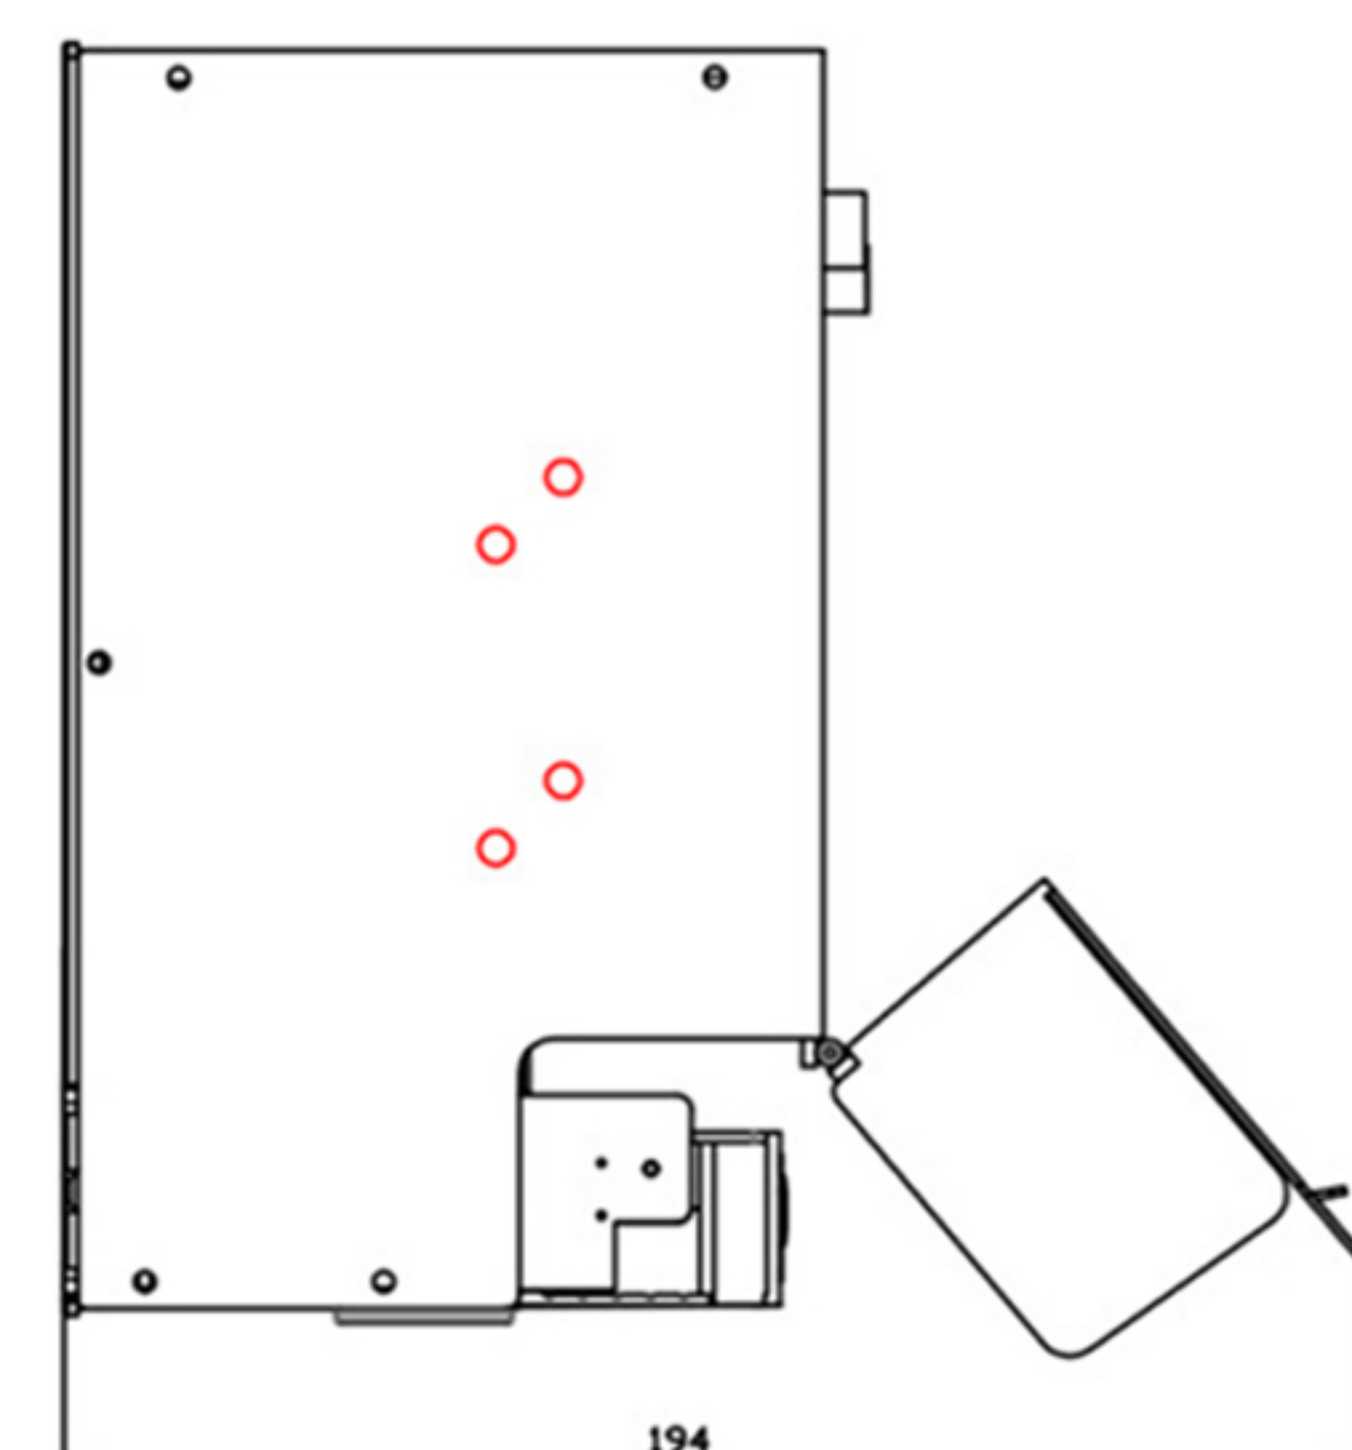

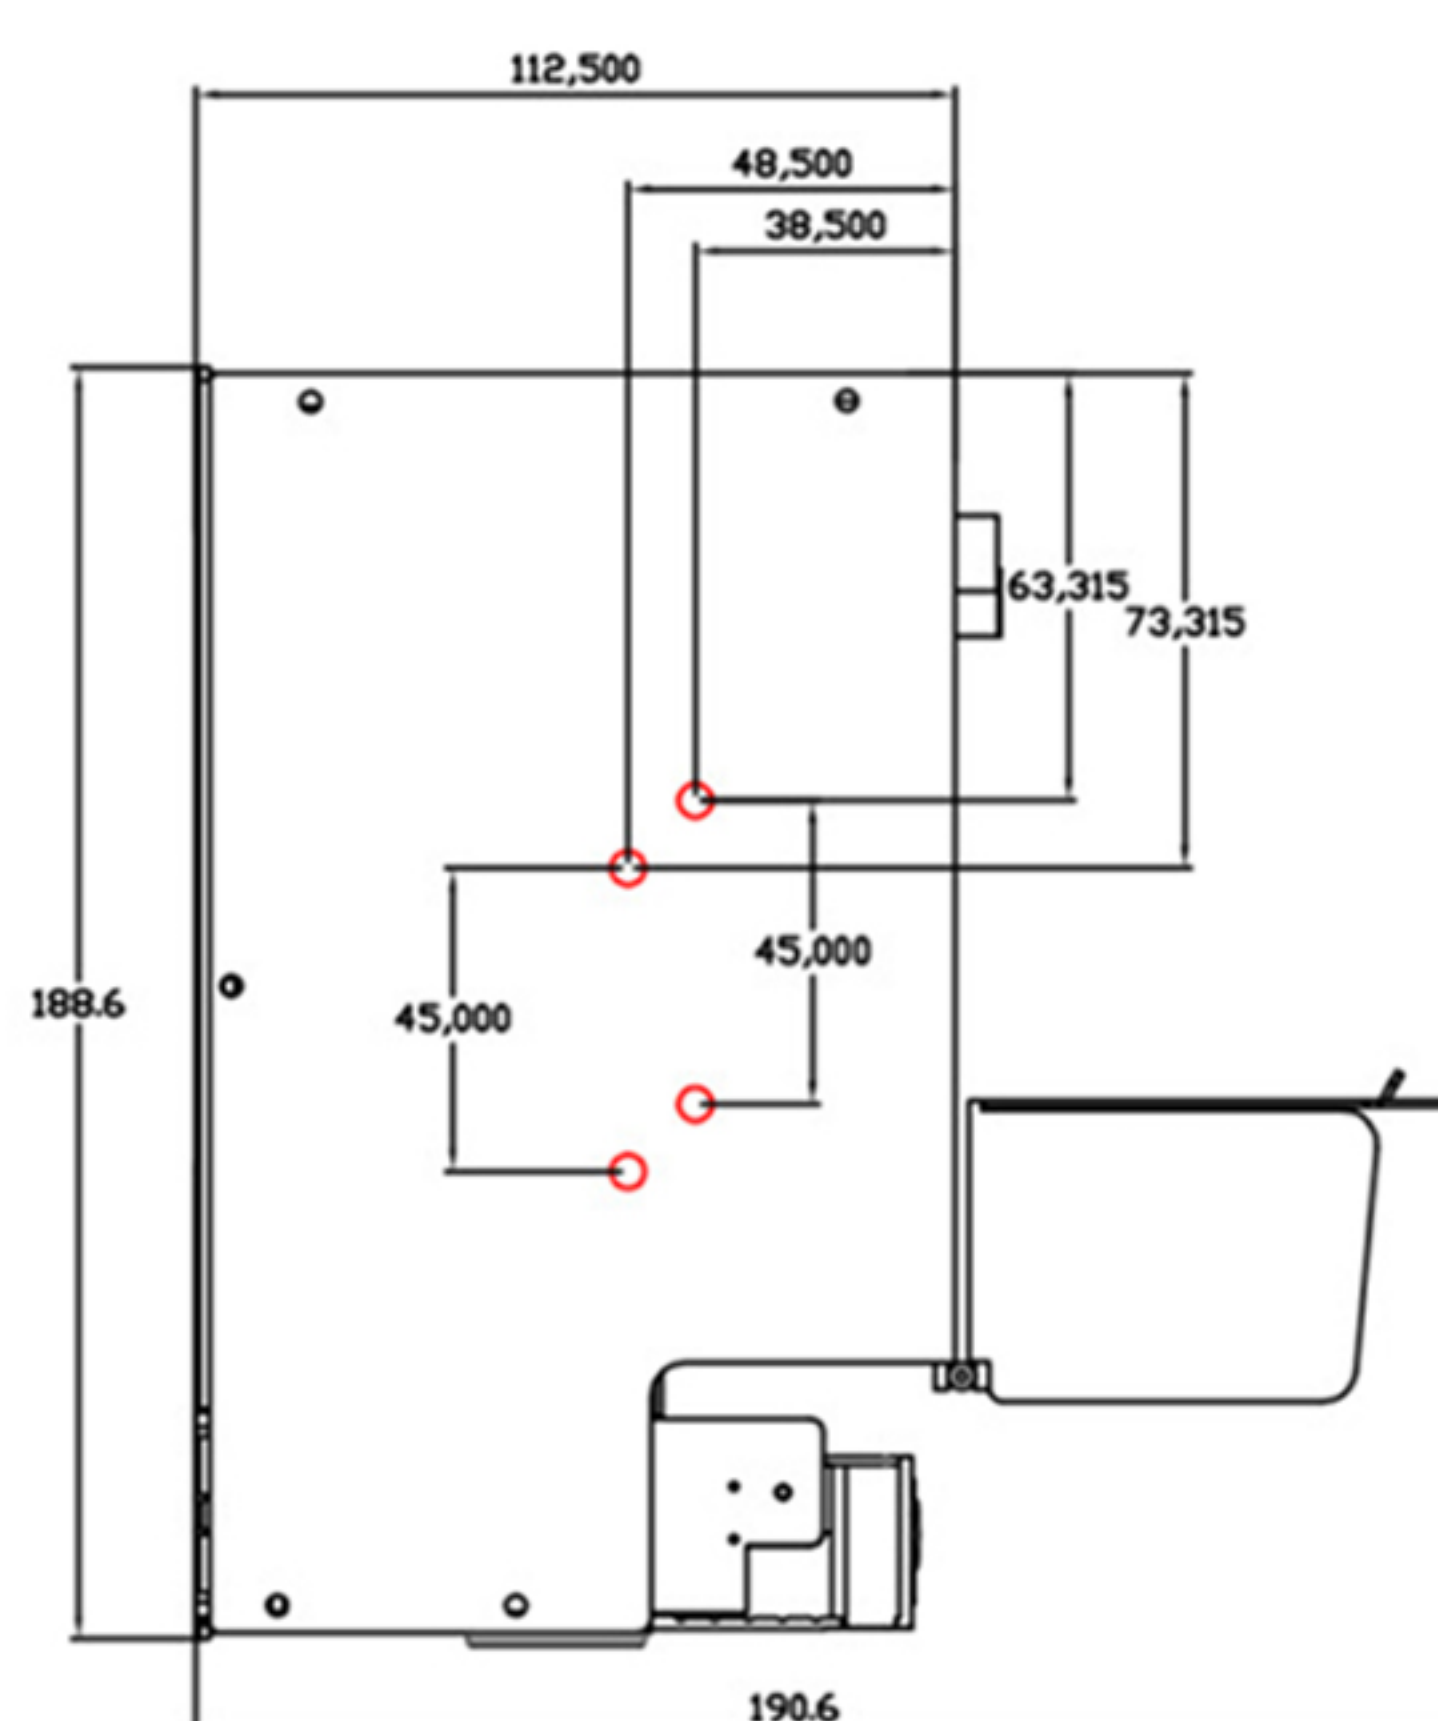

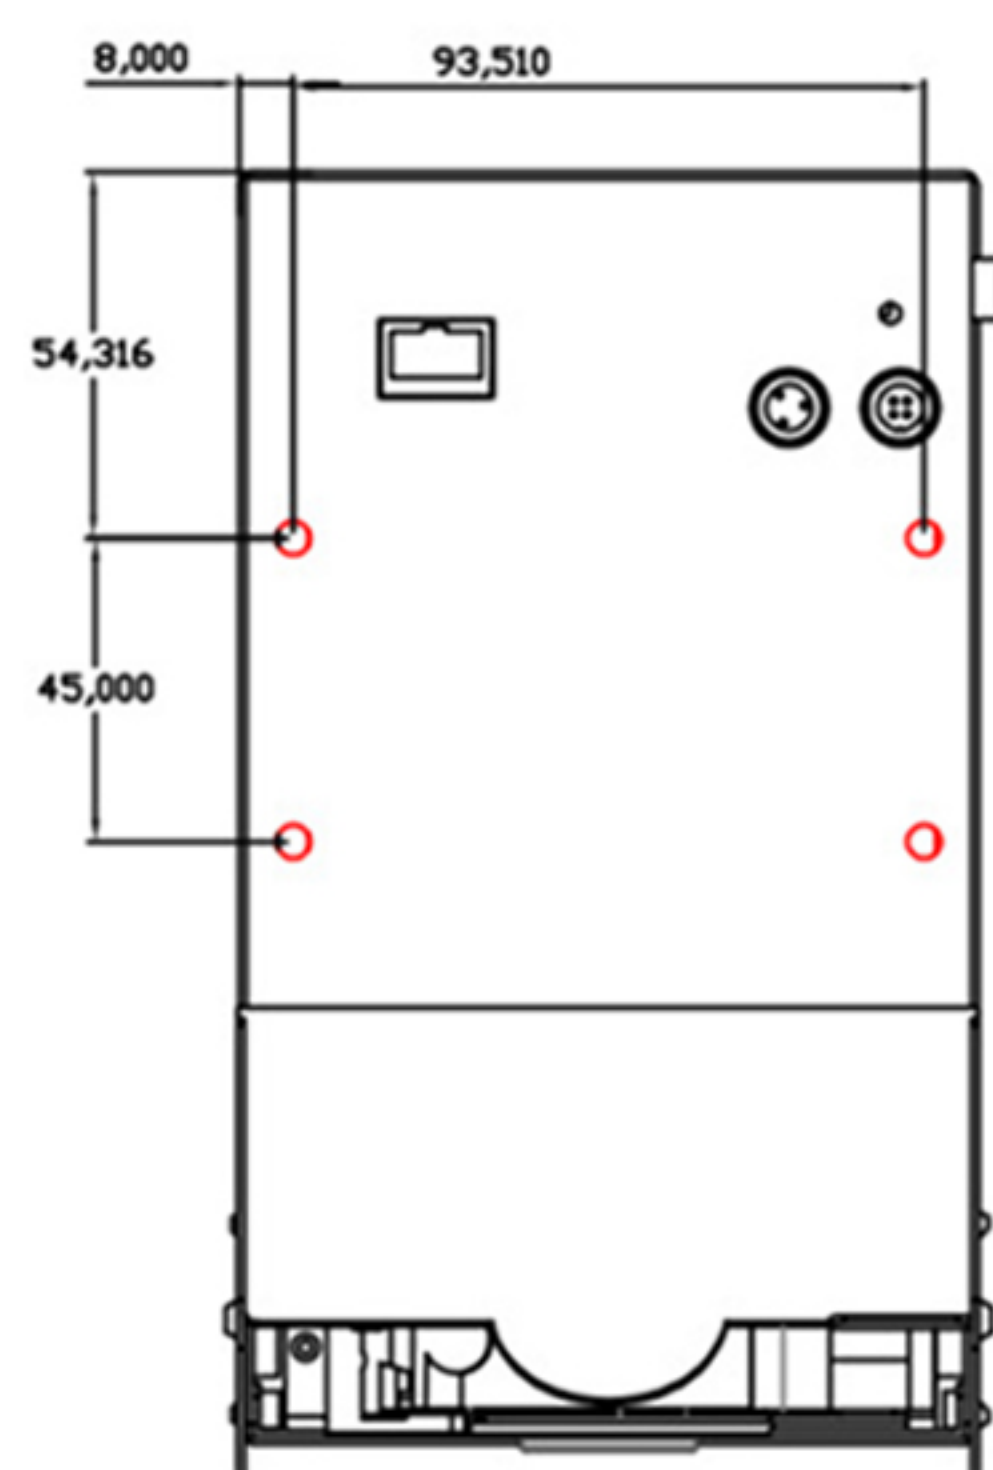

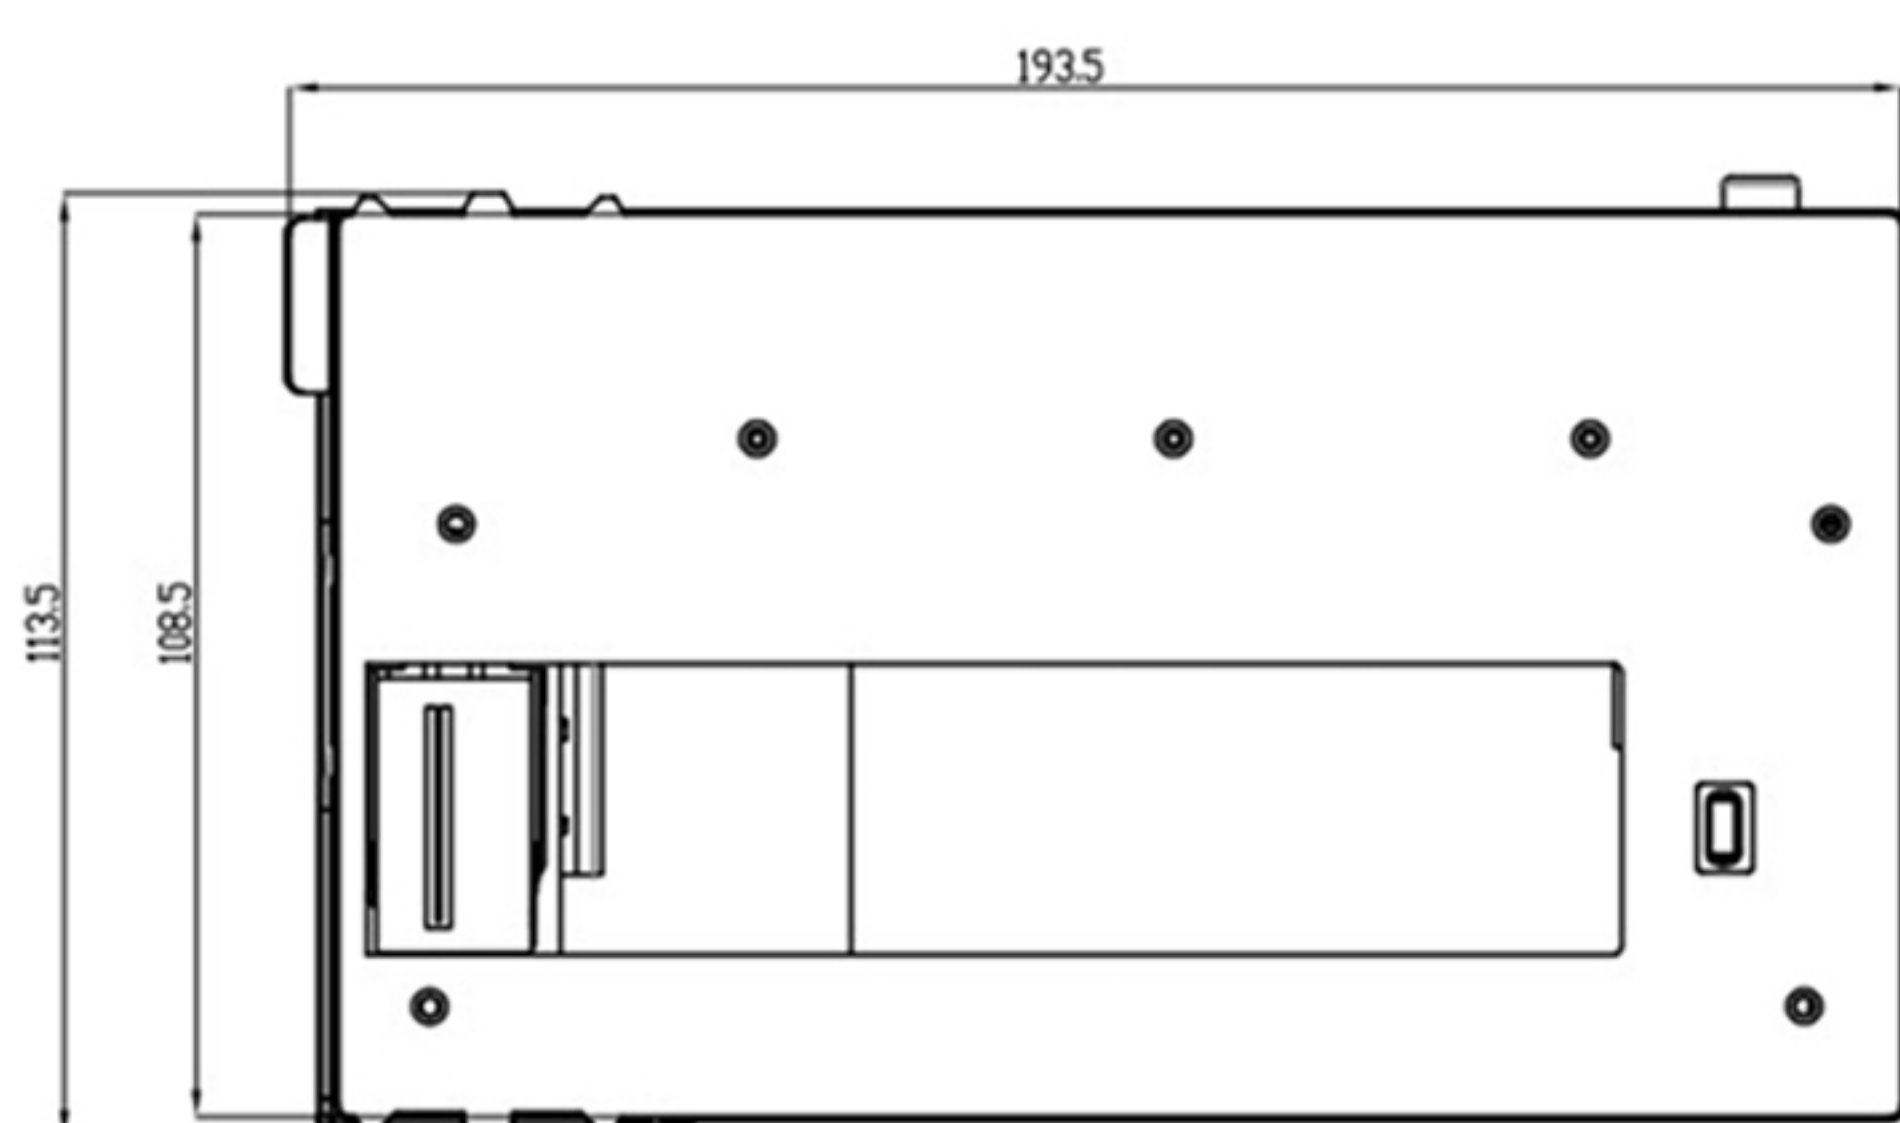

User Interface:
LAN, USB

Voltage:
AC: 110v-220v
a 50-60Hz 1A
